

Environmental Policy

SRXGlobal will minimise its impact to the environment, help to protect the environment, prevent pollution and conserve natural resources by:

- Maintaining compliance with all applicable local and International laws and regulations;
- Minimising the use of natural resources;
- Maintaining an accredited Environmental Management System (EMS) that meets the requirements of ISO14001;
- Reducing waste to landfill by re-using or recycling wherever possible and practical;
- Communicating to interested parties, awareness of our EMS; and
- Setting objectives and targets to continually improve our environmental performance.
