

Quality Policy

SRXGlobal strives to be world leaders in the manufacturing of electronic technology through understanding market trends and knowing our clients' business and using that knowledge to evolve our operations to exceed expectations and create greater value for our clients.

SRXGlobal is committed to quality and continuing effectiveness of the quality management system to support Contract Manufacturing, Testing, Service and Repair of Printed Circuit Board Assemblies and Box Build Assemblies for non-sterile, non-implantable electronic medical devices and other electronic products of our clients.

SRXGlobal strives to meet our customer requirements and maintain compliance with ISO and regulatory requirements (IATF 16949, ISO13485, ISO9001 and 21 CFR Part 820 (QSR)) with a focus on improving Customer Satisfaction and Continuous Improvement through continual monitoring and measurement of our core processes and prevention of nonconformity.
